

About

DEEPX is a software for searching the Internet using multiple search engines to answer the user's query, such a tool allows to collect and display sites containing information from the Web on terms of the user's choice.

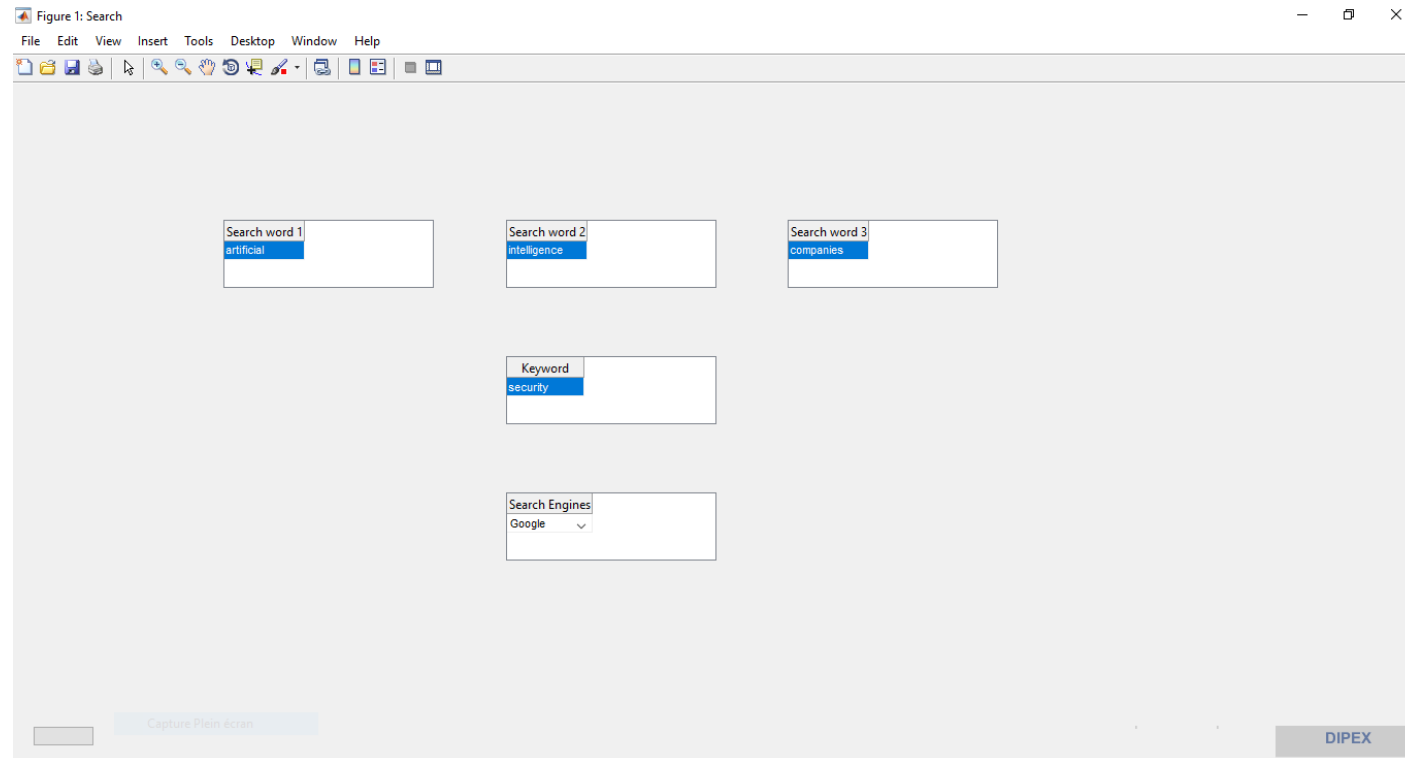

Diffrent Features

- 01.** Search
- 02.** Analyze
- 03.** Speculate
- 04.** Investigate
- 05.** Mass Investigation

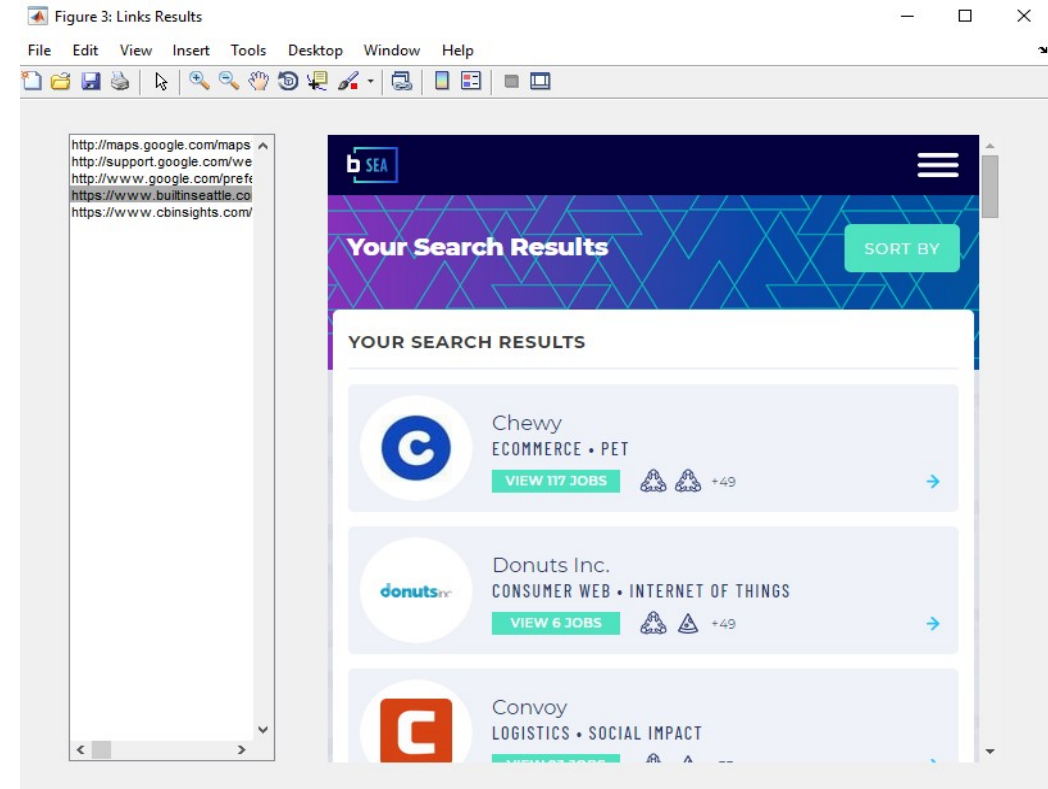

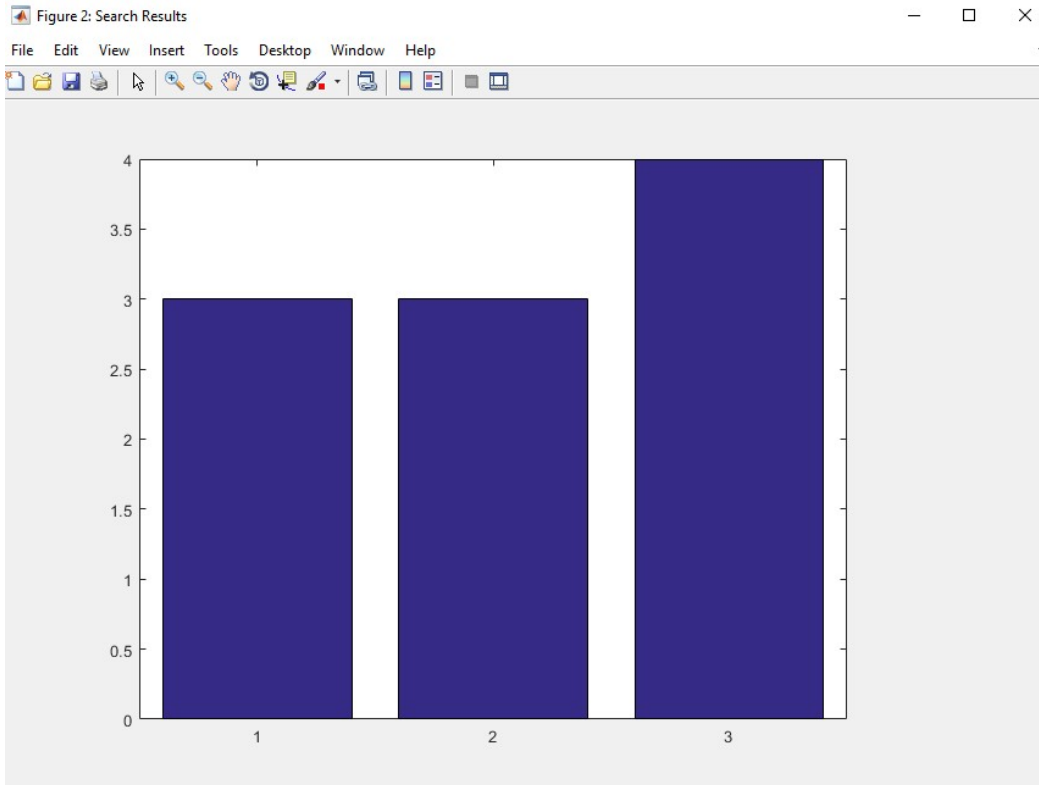

How it works?

First module : Search

The user must enter 3 search words and a keyword, and choose the search engine (Google, Bing...)

How it works?

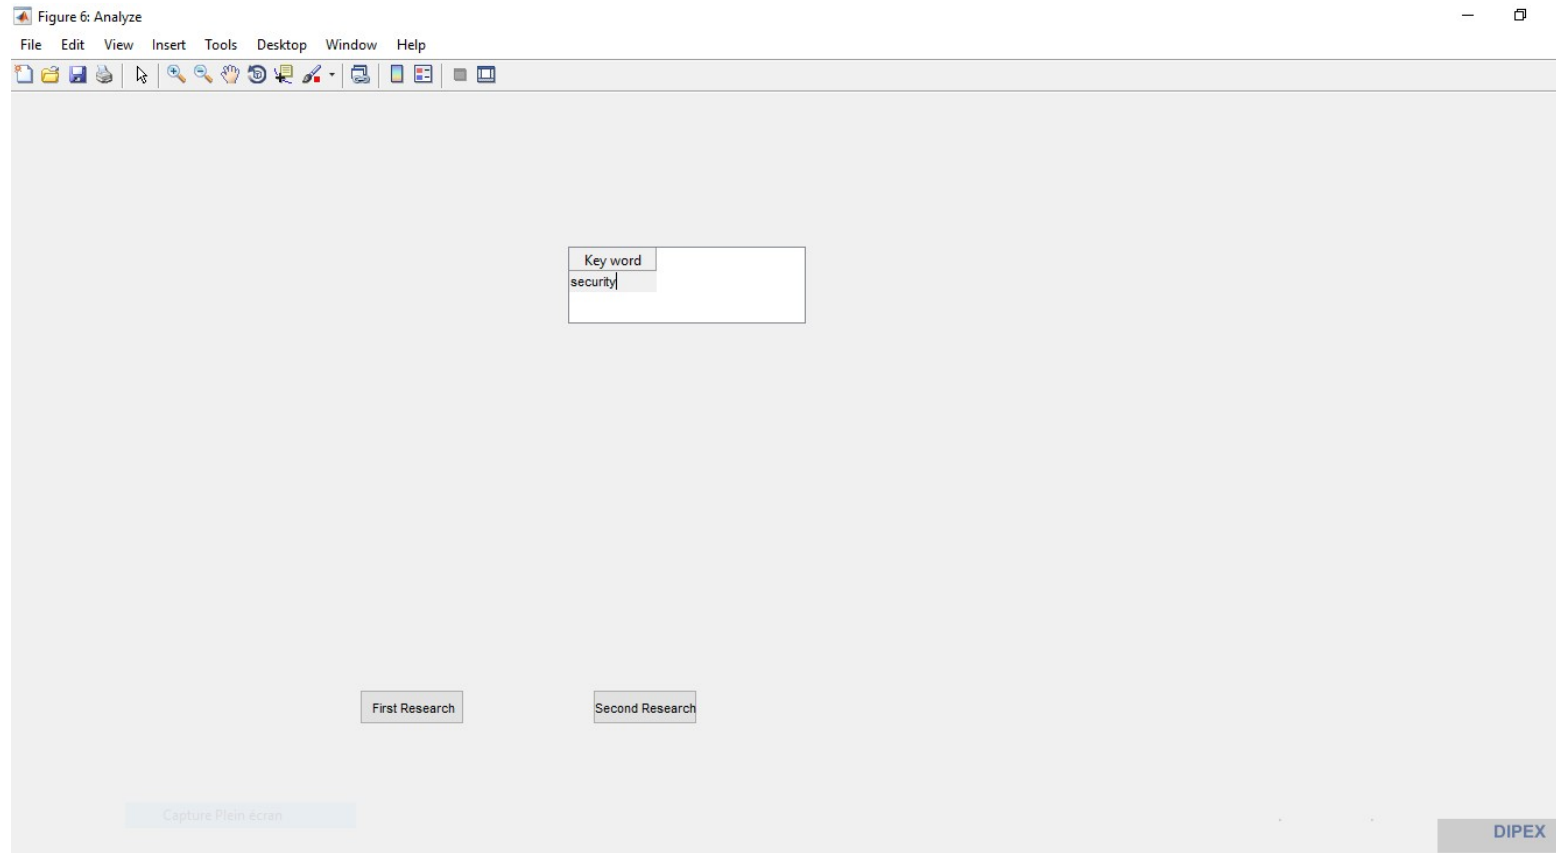

The results provided by DEEPX are the links of the answer sites as well as the ranking of these links according to the keyword occurrence.

How it works?

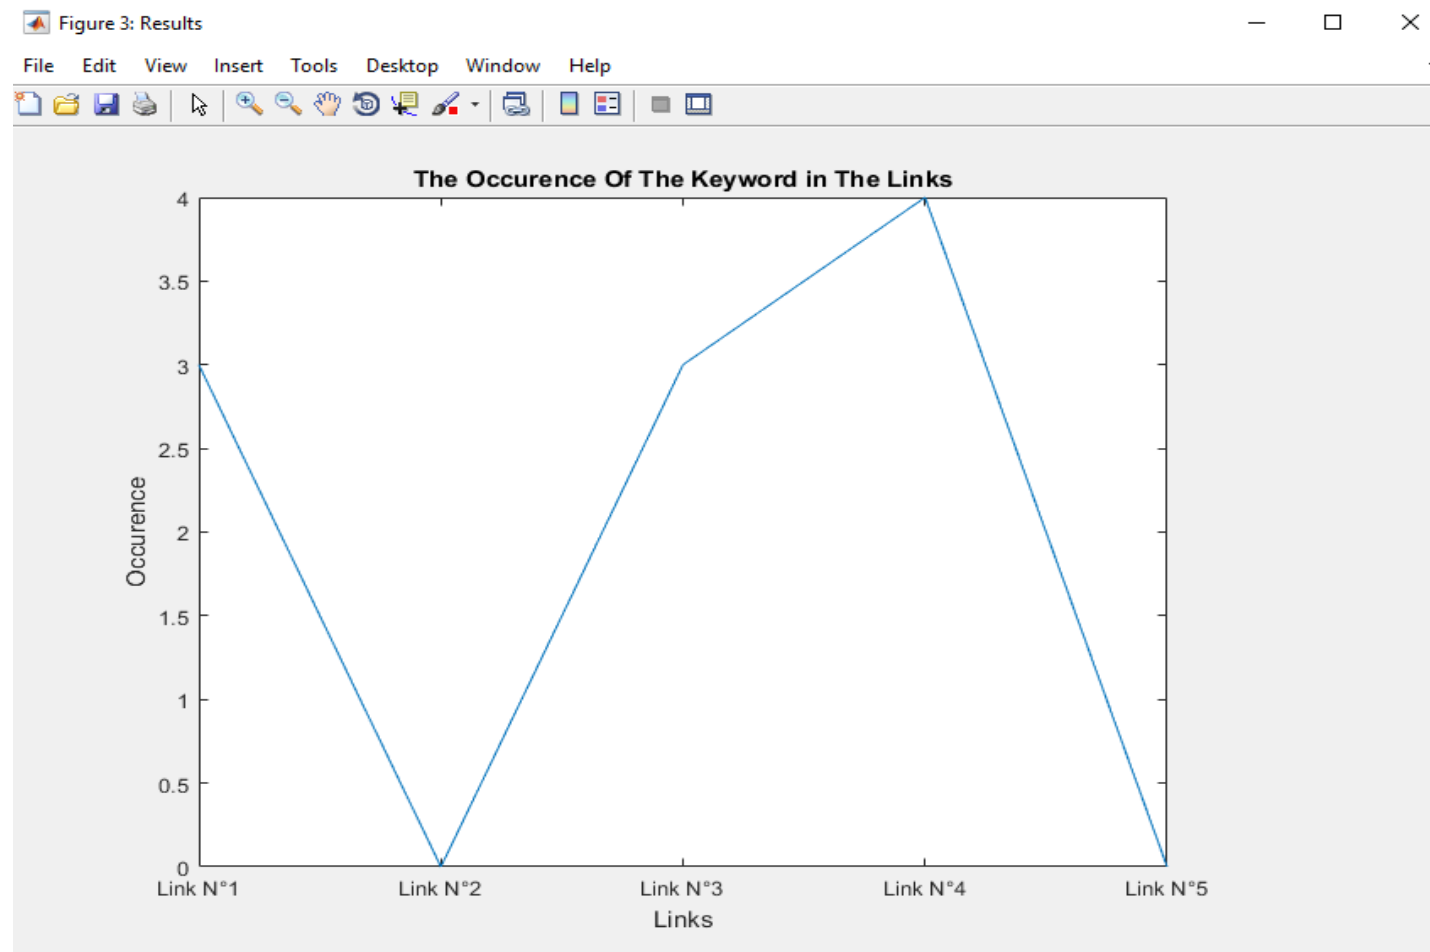

Second module : Analyze

Here the user must enter the keyword. When running the first module, the search can be done several times (first search, second search...)

How it works?

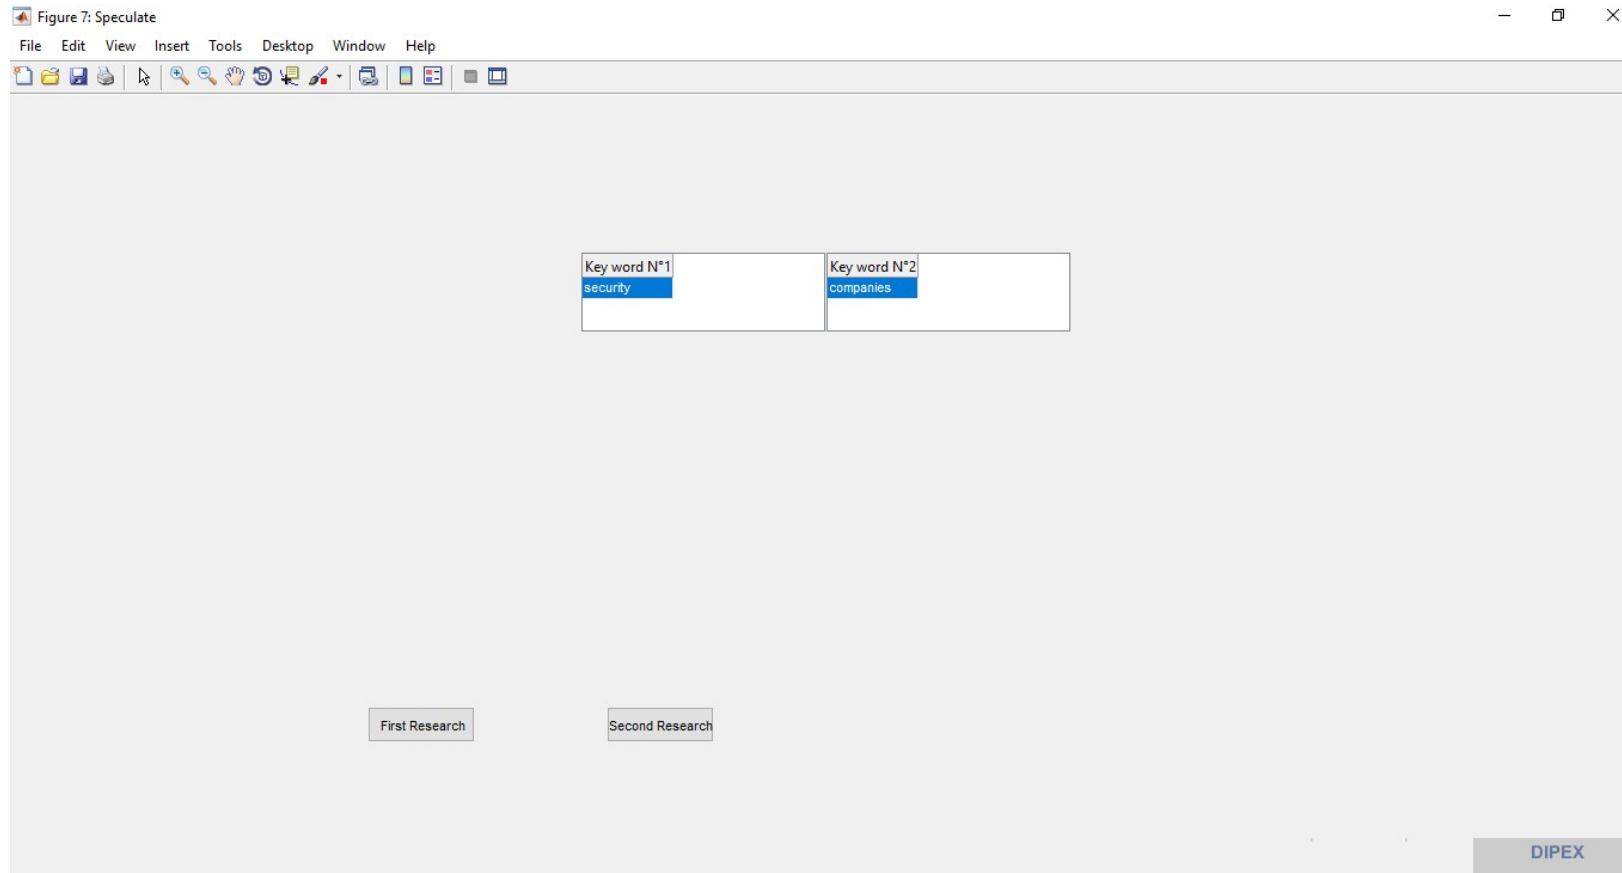

For each search, DEEPX performs an analysis according to the keyword entered by the user, and plot the variation of the keyword in the links.

How it works?

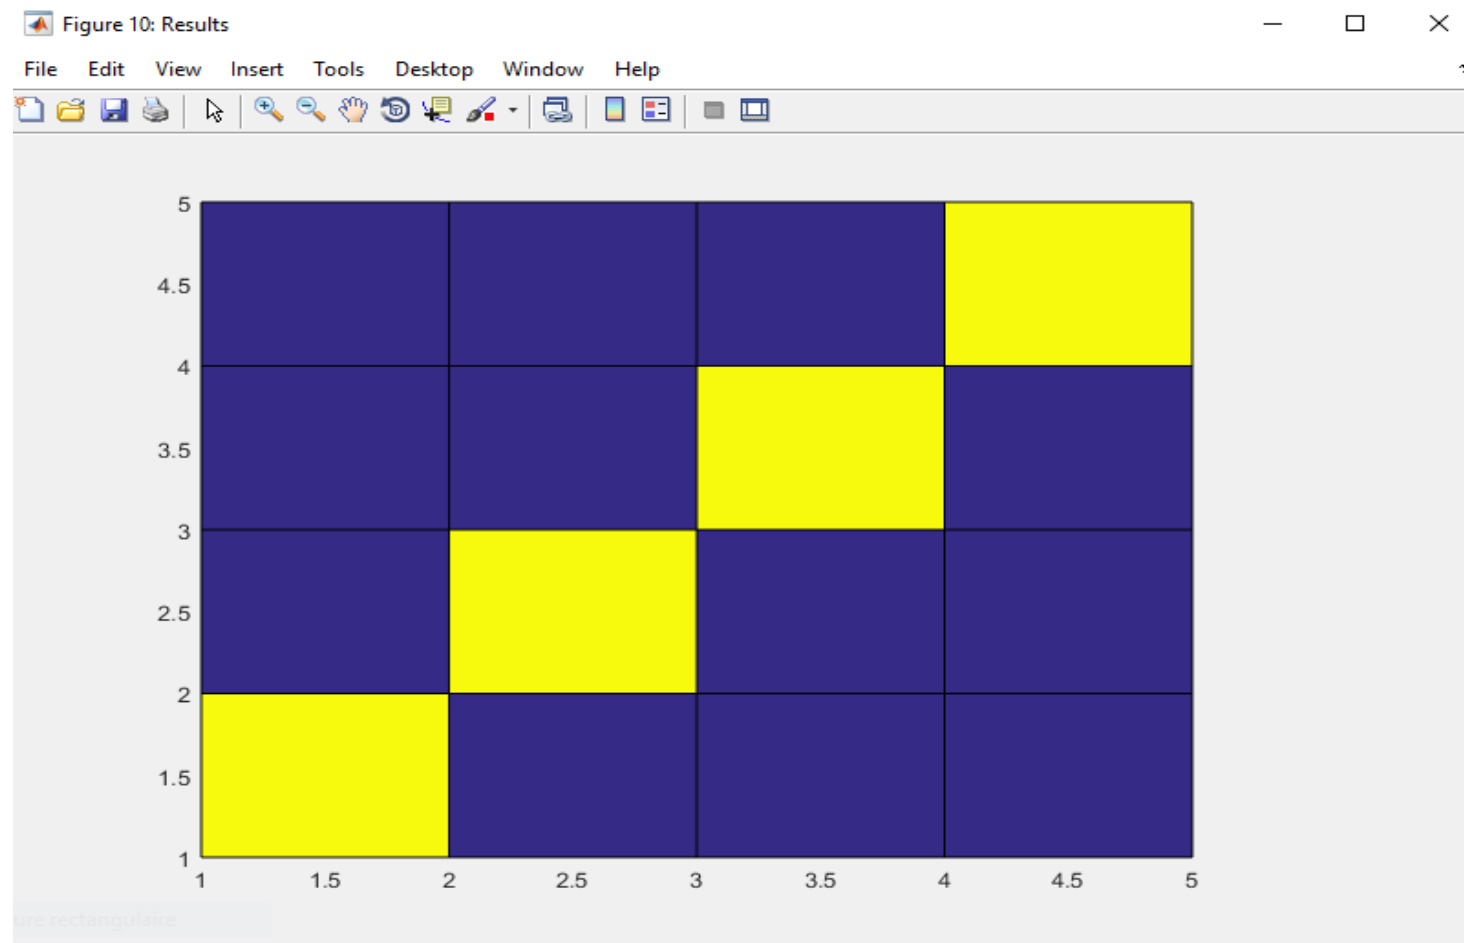

Third module : Speculate

After searching and analyzing the found links, DEEPX speculates on the behavior of these websites.

How it works?

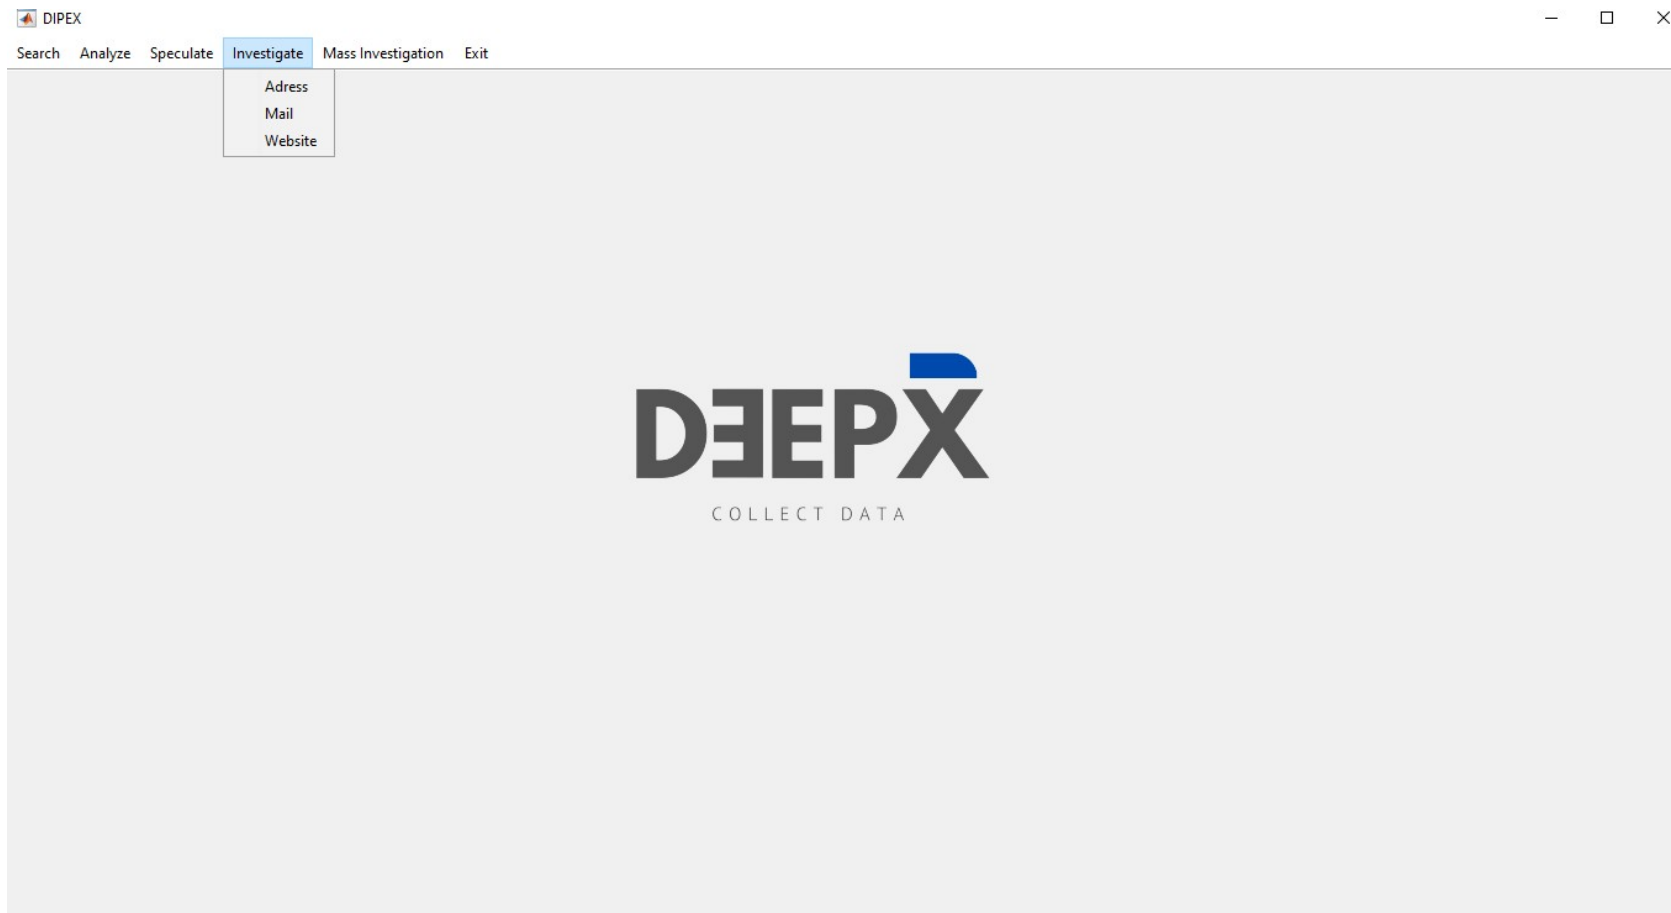

The result of the third module is a decision matrix

How it works?

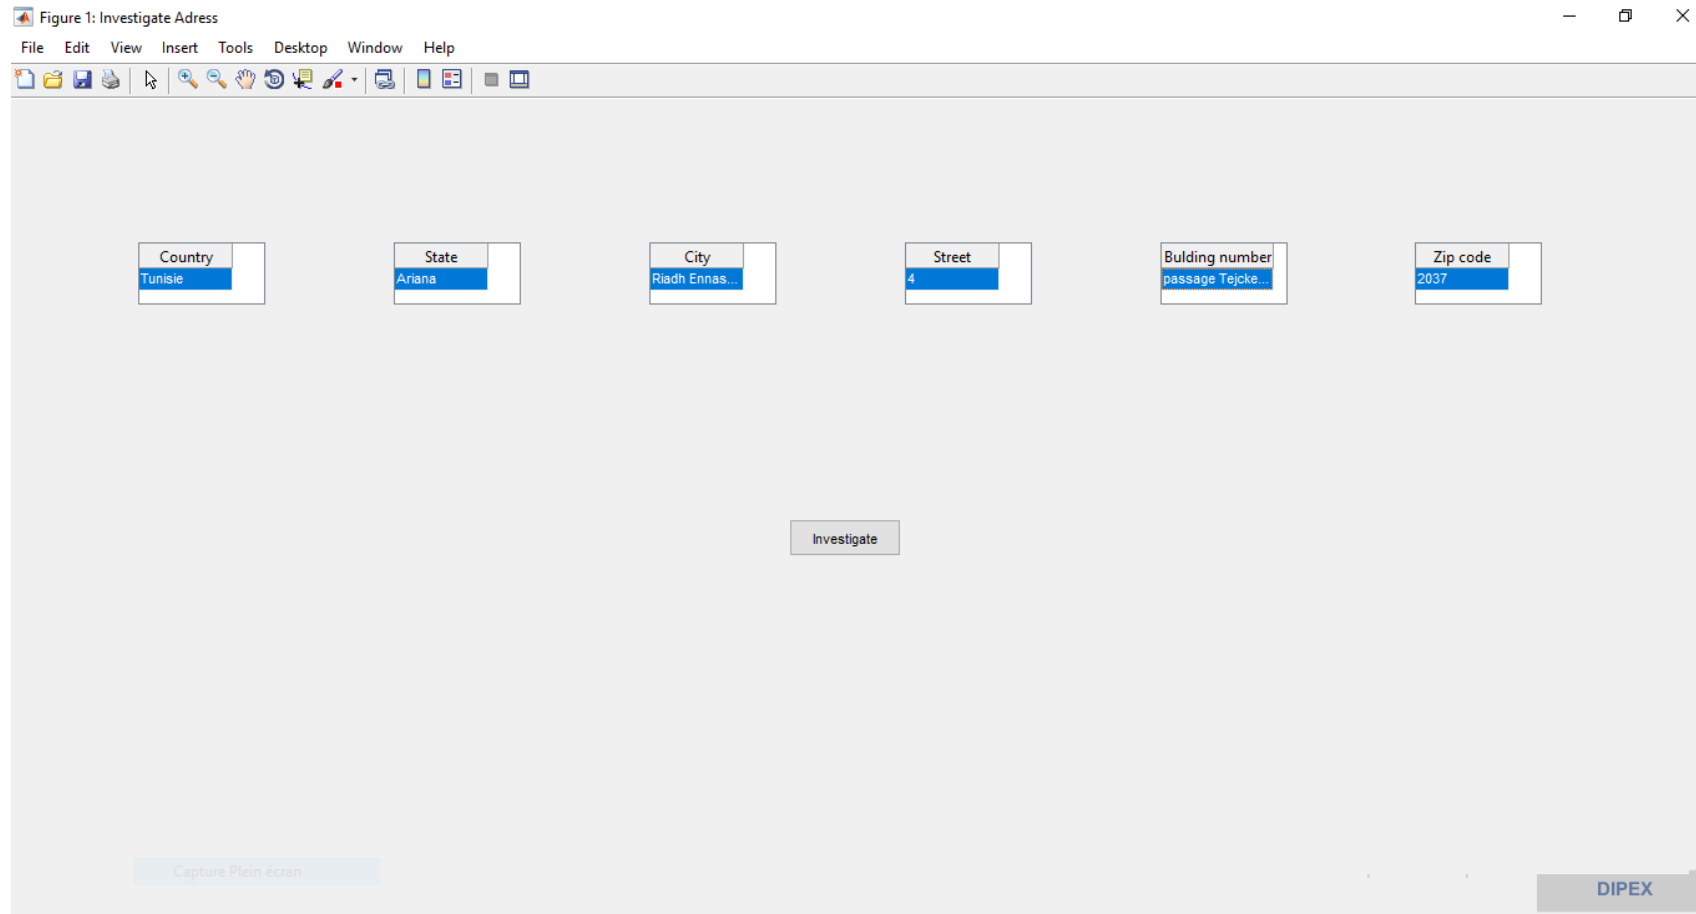

Fourth module : Investigate

DEEPX allows the user to make investigations and to identify the interest, according to an address, an e-mail or a web site.

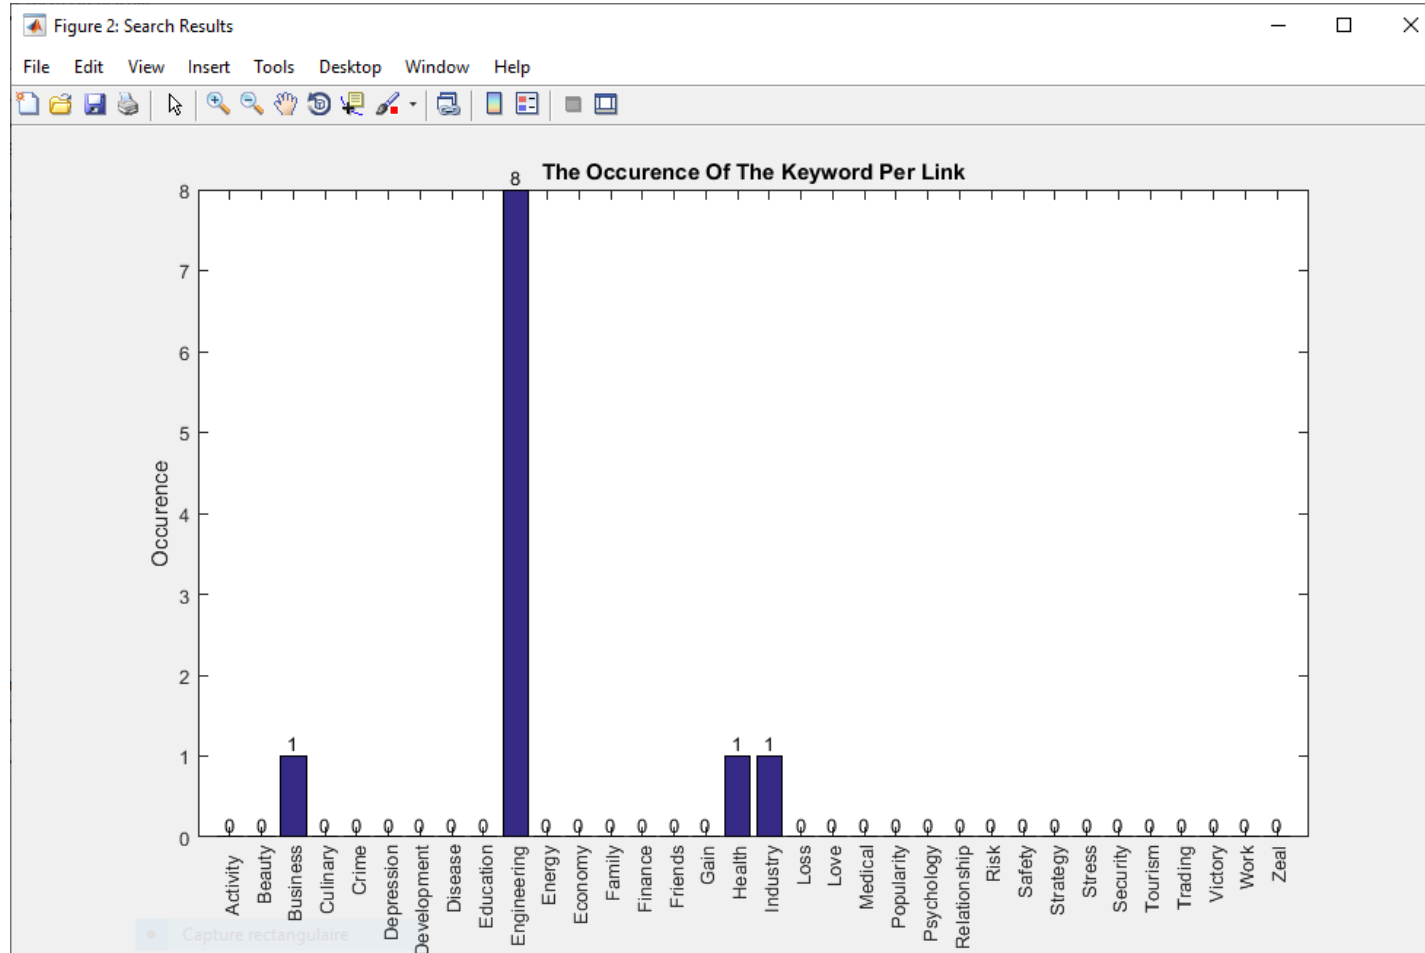

How it works?

Fourth module : Investigate_Address

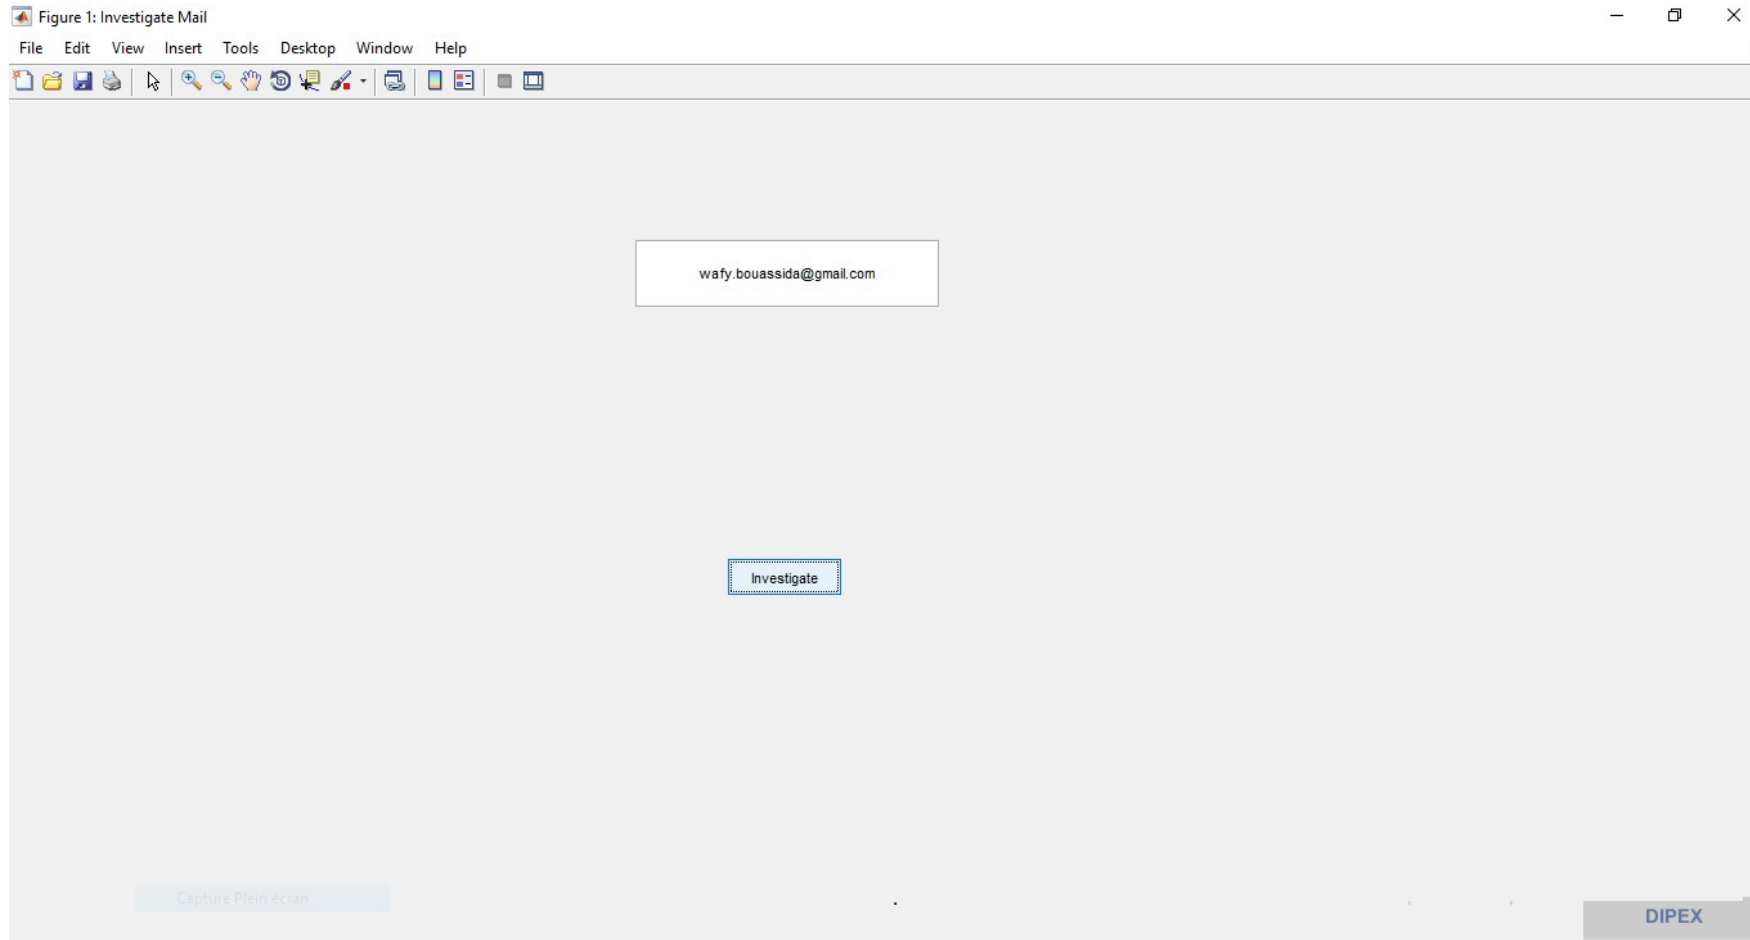

How it works?

Fourth module : Investigate_Adress

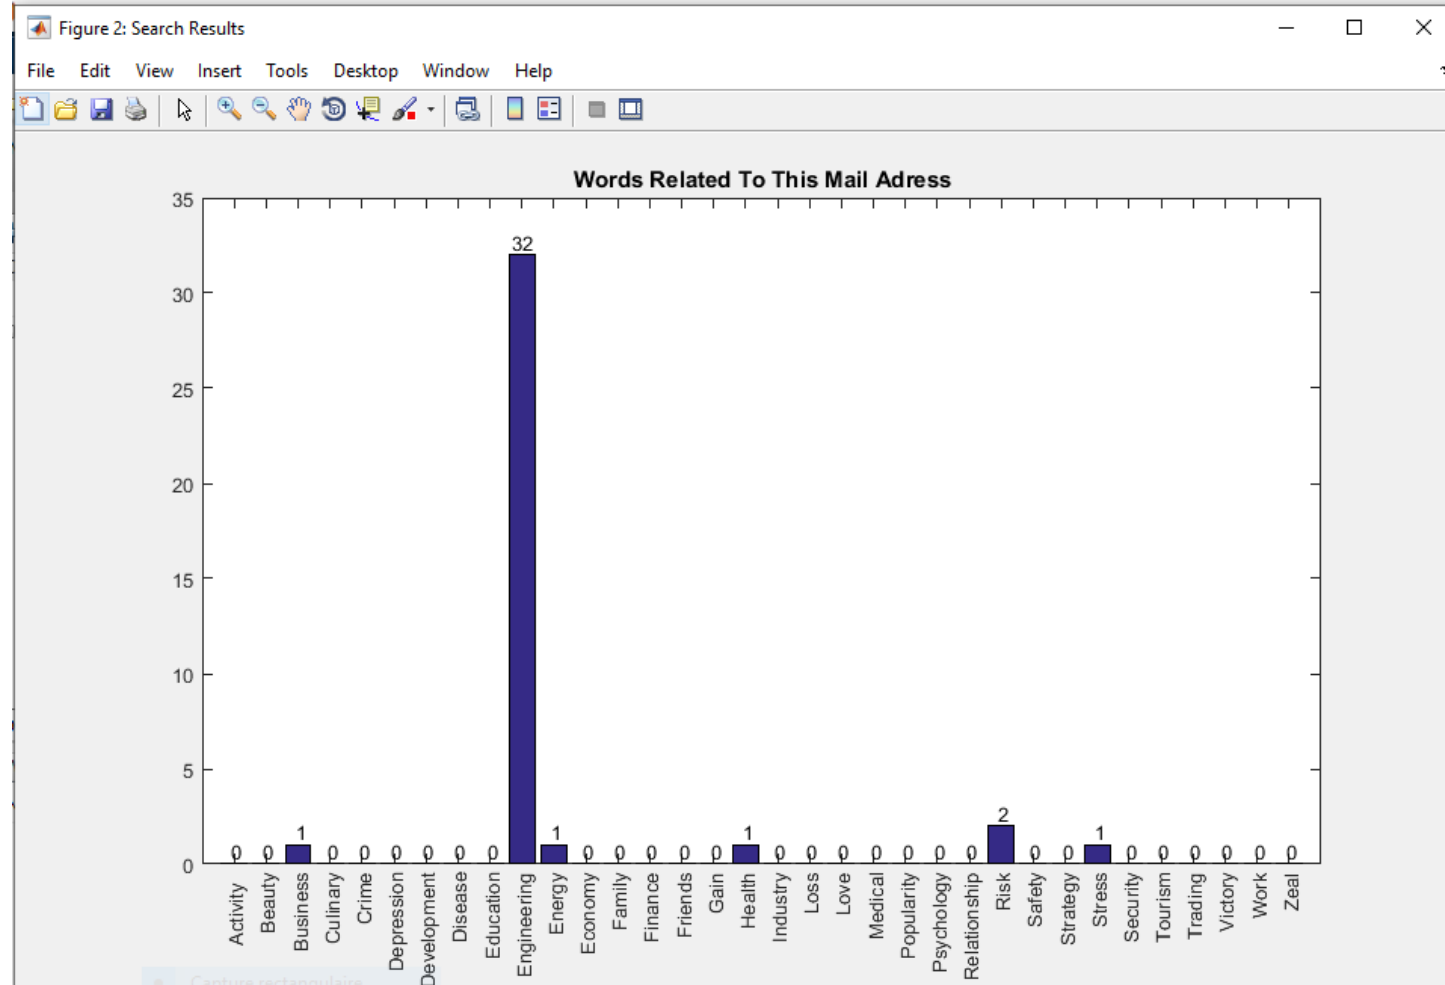

How it works?

Fourth module : Investigate_mail

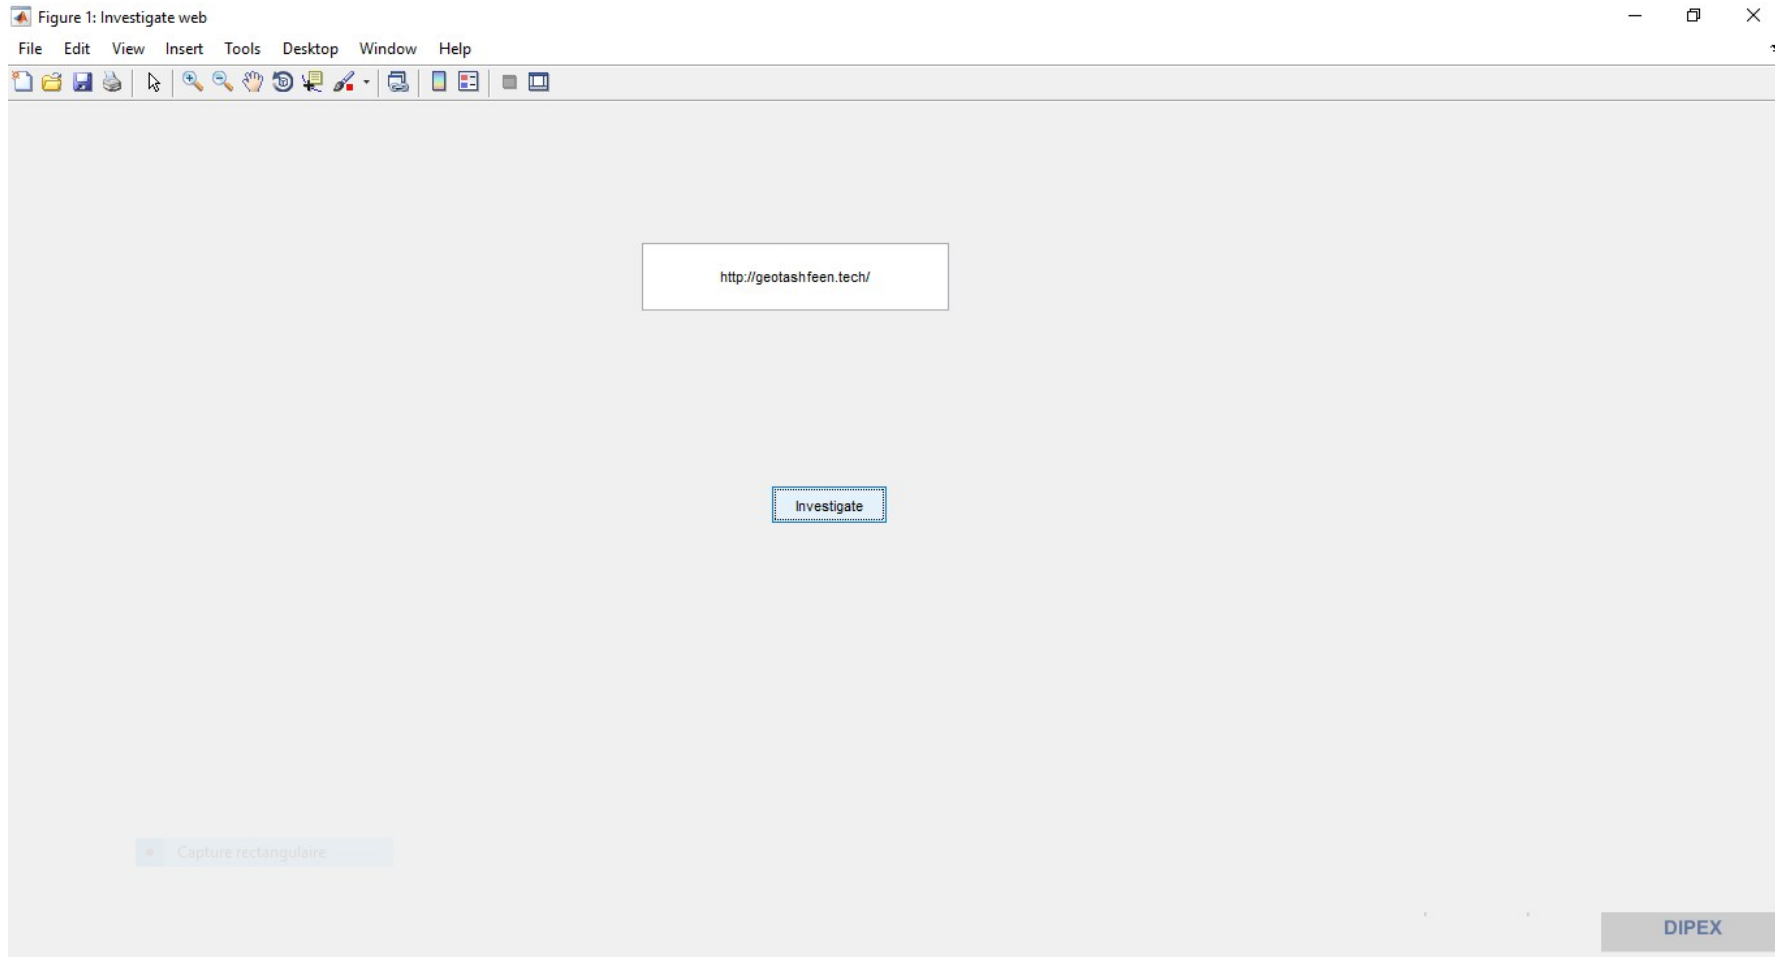

How it works?

Fourth module : Investigate_mail

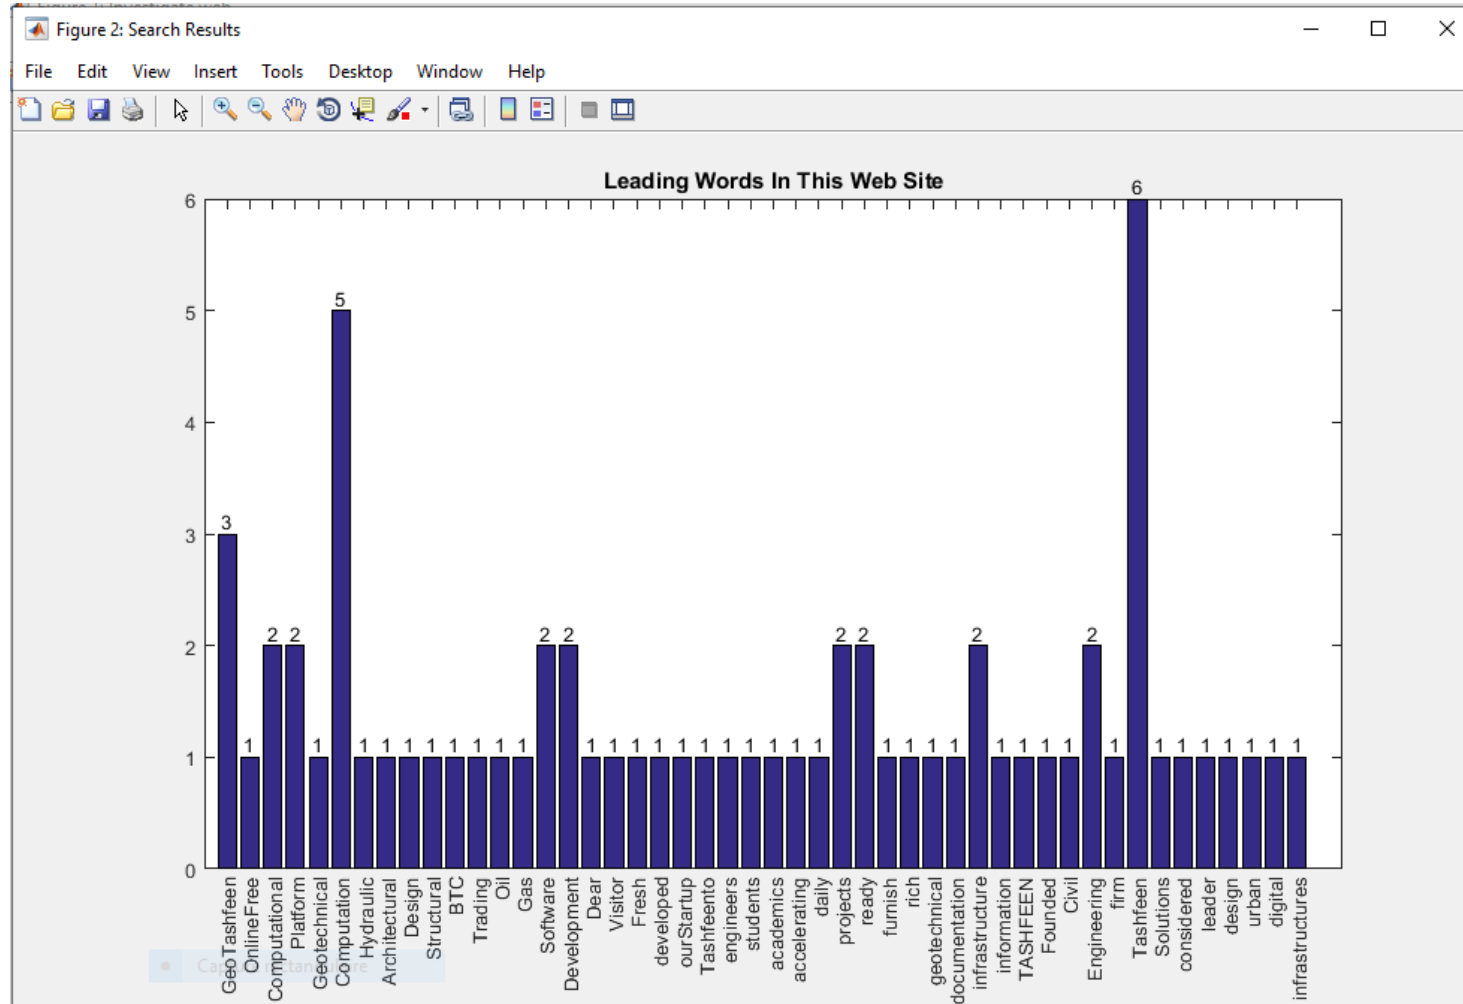

How it works?

Fourth module : Investigate_website

How it works?

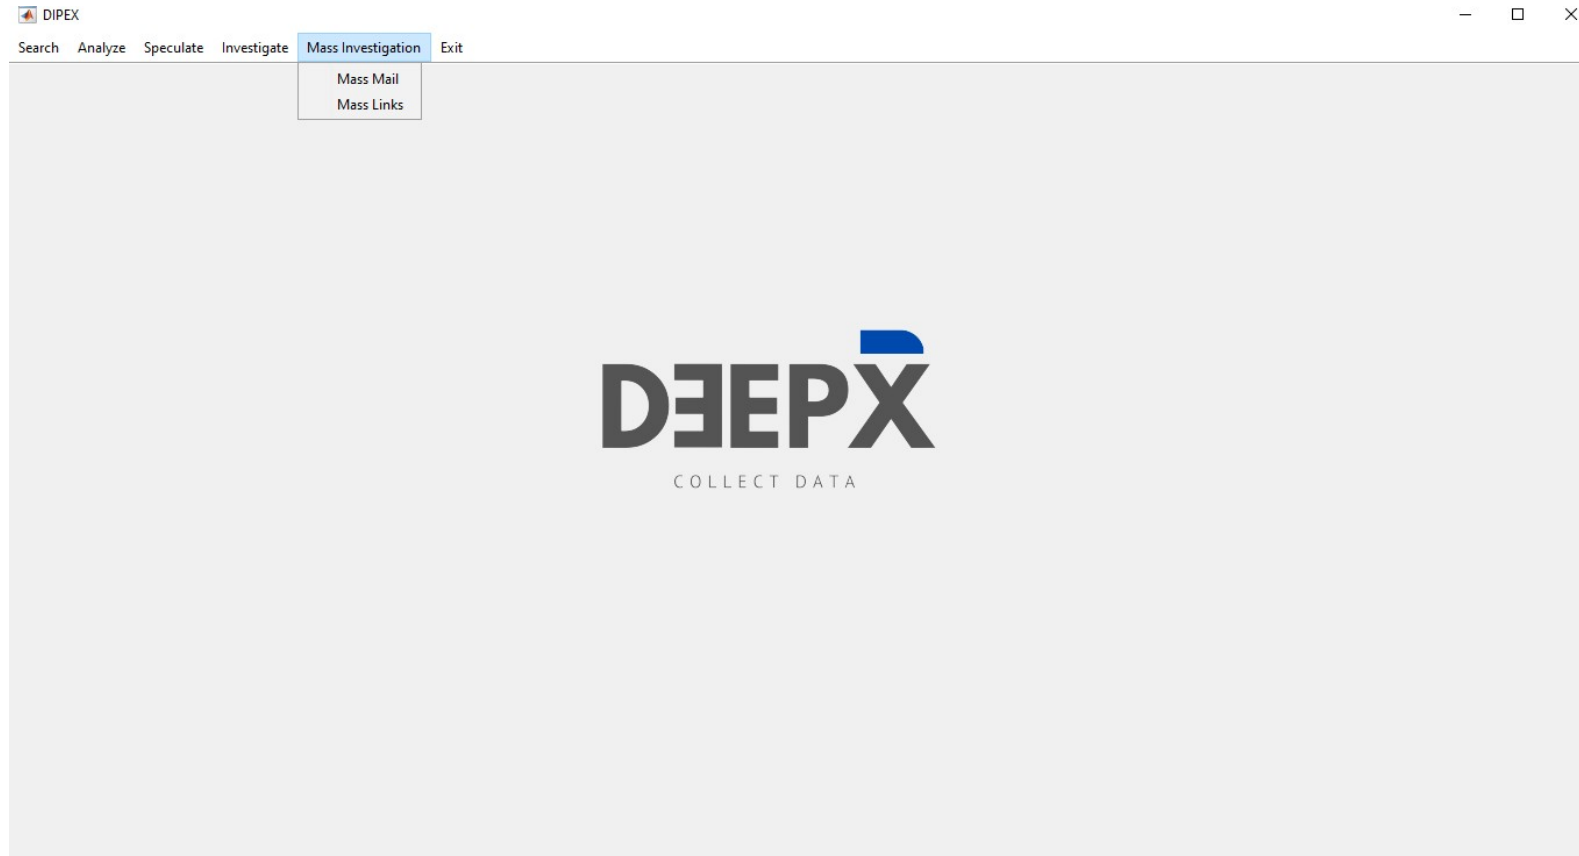

Fourth module : Investigate_website

How it works?

Fifth module : Mass Investigation

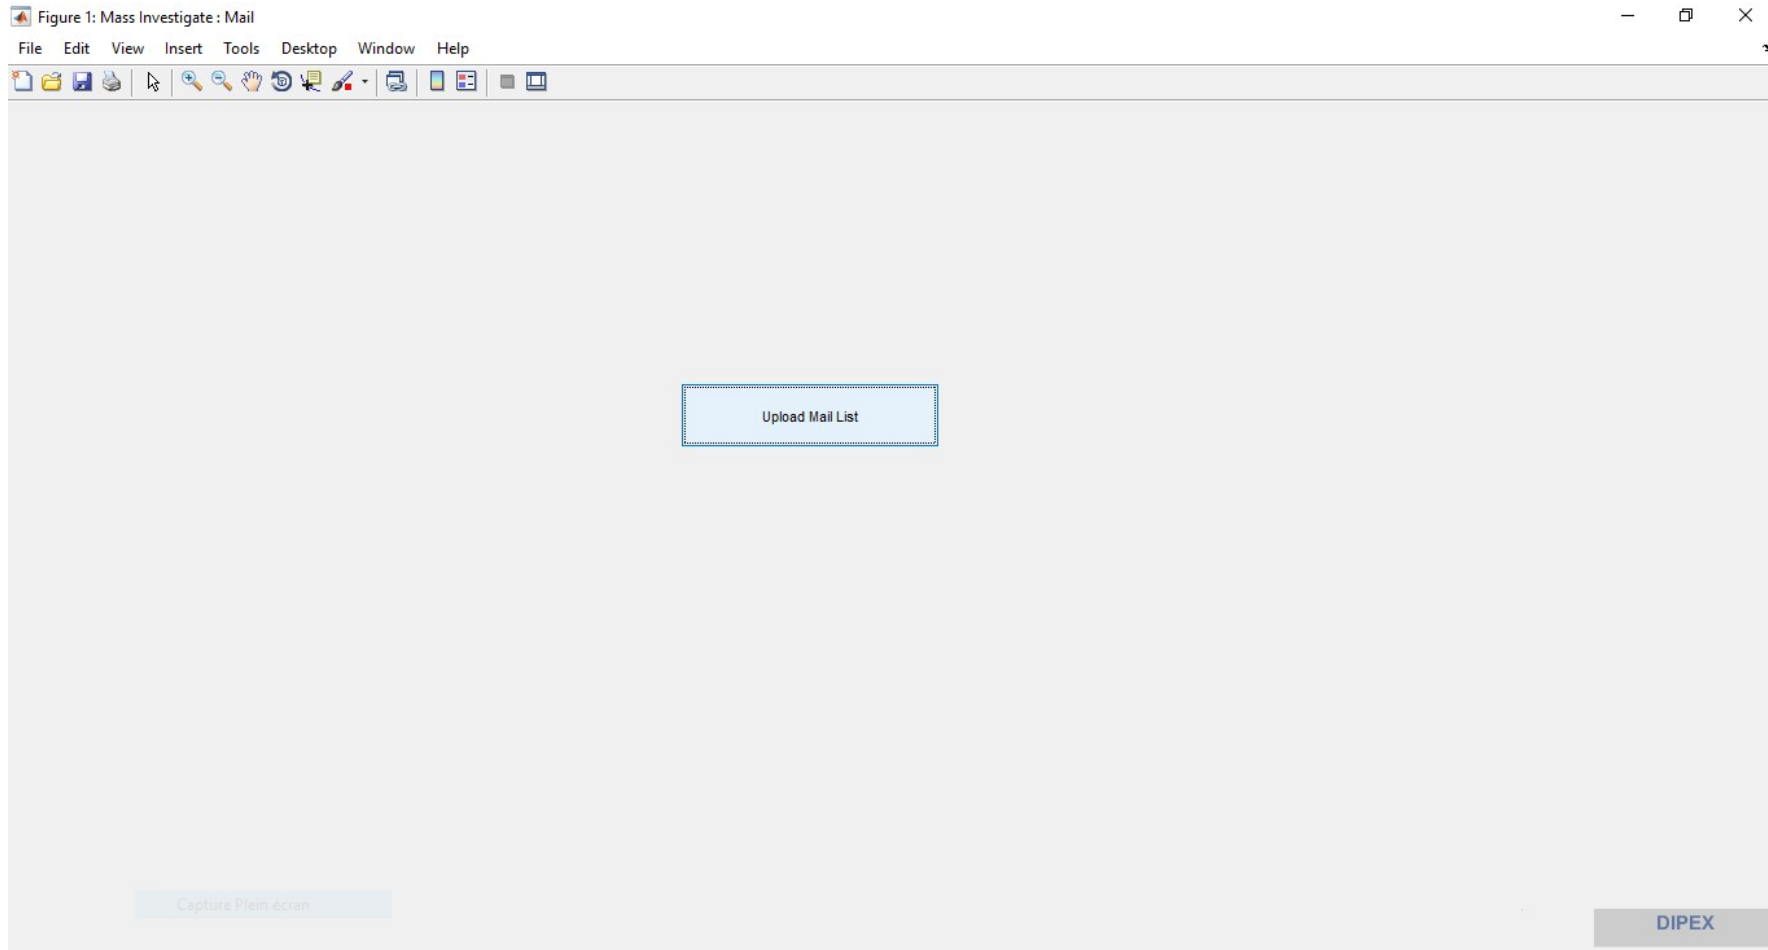

If the user has a list of emails or websites, DEEPX proposes to use this module.

How it works?

Fifth module : Mass Investigation_Mails

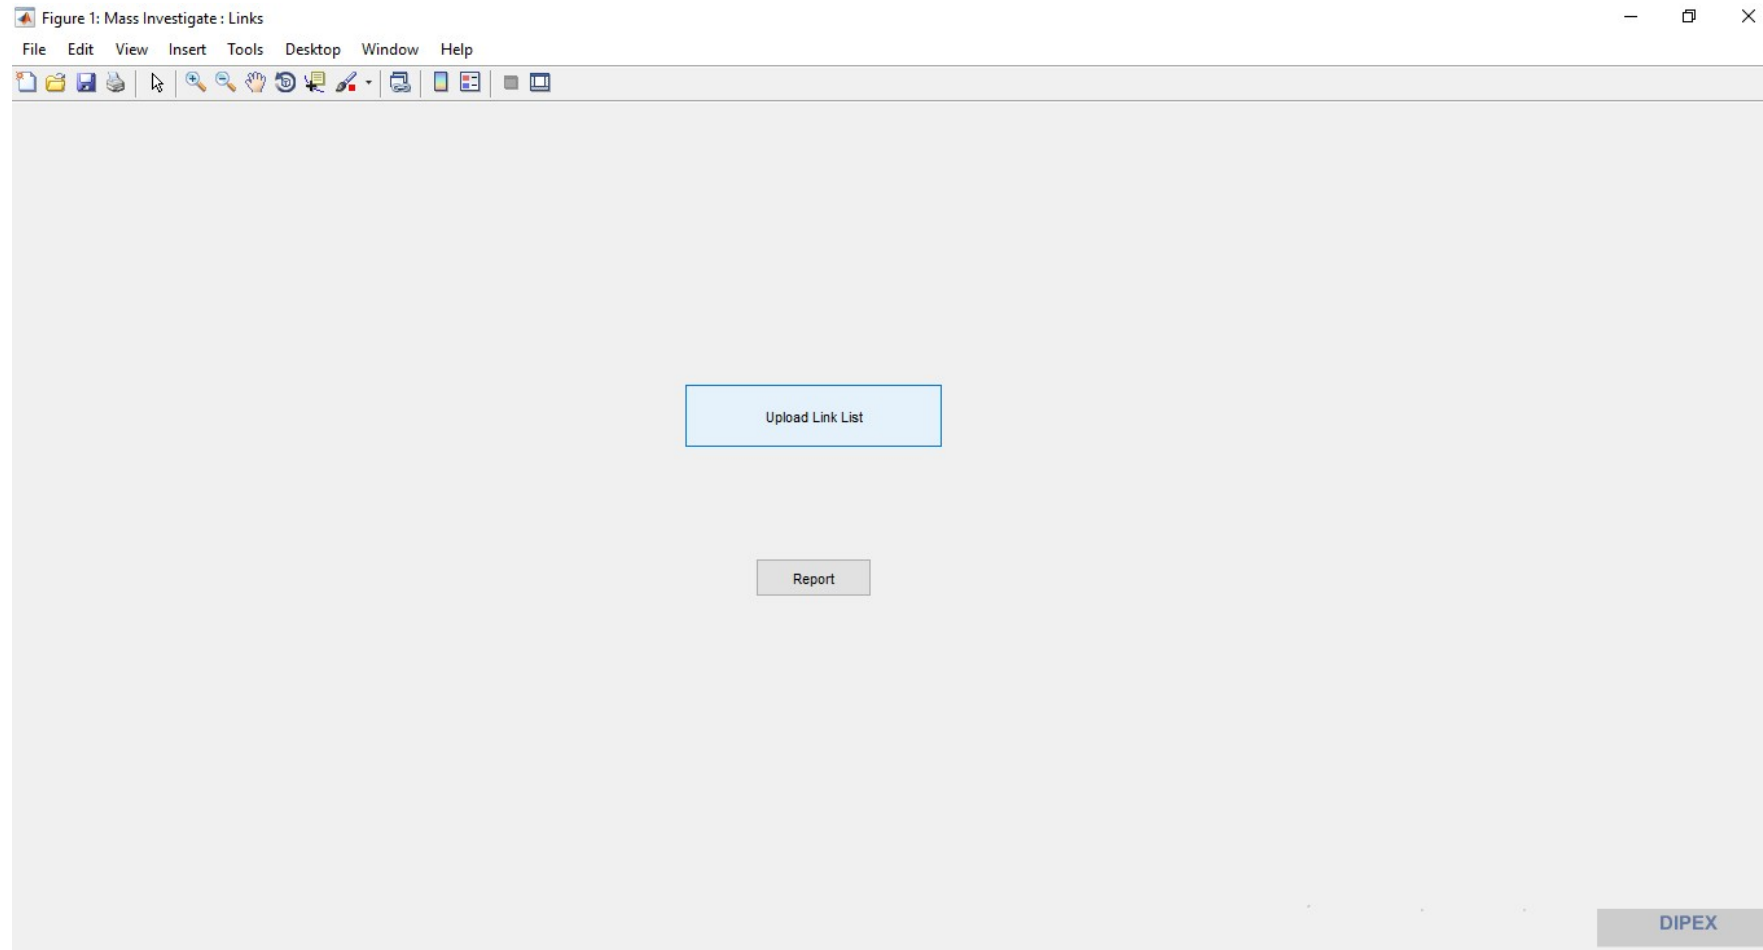

Here the user upload the list of mails, and DEEPX returns folder that contains links of each mail.

How it works?

Fifth module : Mass Investigation_Links

Here the user upload the list of links, and DEEPX returns PDF file that contains graph of the leading words for each link.
